DETAILED ACTION

Election/Restrictions

A telephone call was made to Andrew Dorisio on March 29, 2005 to request an oral election to the below restriction requirement, but did not result in an election being made.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 12-16, drawn to a liner for a cargo transport vehicle, classified in class 414, subclass 373.
- II. Claims 9-11, 19 and 20, drawn to a method of erecting a liner, classified in class 414, subclass 809.

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case it is well known to erect a liner in a transport vehicle by hand.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
